Autoimmune Disease Facts and Myths: Six Fast, Easy and Economical Solutions for Complete Recovery That Your Doctor Doesn't Know About

SOURCE Triad of Health Family Healing Center

Autoimmune Disease is the third most common disease type in the United States after cancer and heart disease. According to conventional medicine there is no cure for autoimmune disease. However, according to Complimentary and Alternative Medicine (CAM), Autoimmune Disease is reversible in most cases. The local Triad Of Health Family Healing Center office in San Rafael, California, is now offering free 2-hour Autoimmune Disease workshops for a limited time to allow people who suffer from the condition a chance to learn how they can get help and put an end to the aggravation, irritation, frustration and confusion often associated with these autoimmune conditions.
SAN RAFAEL, Calif., July 15, 2019 /PRNewswire-PRWeb/ -- Autoimmune disease is the third most common category of disease in the United States after cancer and heart disease. What is fascinating about this statistic is that both cancer and heart disease are autoimmune in nature. Autoimmune Disease now affects fifty million Americans and Autoimmune Spectrum Disorder conditions with the same inflammatory cause as Autoimmune Disease affect hundreds of millions of people in the United States alone. Autoimmune Disease is an epidemic. The underlying causes of Autoimmune Disease always include inflammation, multiple infections of the digestive system and toxicity. Some examples of autoimmune conditions are arthritis, asthma, eczema and cardiovascular disease. Some of the other well-known Autoimmune Diseases are Grave's Disease, Psoriasis, Fibromyalgia, Lupus, Celiac's Disease, Hashimoto's thyroiditis, Rheumatoid Arthritis, Chronic Fatigue Syndrome, Crohn's disease, Ulcerative Colitis, Multiple Sclerosis, Scleroderma, Diabetes Type 1, Diabetes Mellitus, Pernicious Anemia, Sjogren's Syndrome, Glomerulonephritis, Vitiligo, CREST Syndrome, Hepatitis and Alopecia.

But what do you do about it?

Autoimmune disease is among the top 10 leading causes of death for girls and women of all ages according to the National Institutes of Health. Conventional medicine does not seem to have any good solutions for Autoimmune Disease as many of the prescription medications that alleviate autoimmune symptoms also contribute to their cause. Conventional Medicine, also called allopathic medicine, has developed from a model of medicine that is best designed for emergencies such as that type of health care needed on a battlefield; but it fails to address the underlying causes of chronic disease (such as Autoimmune Disease). The allopathic medicine model of healthcare is not appropriate for chronic disease (Autoimmune Disease) whereas Complimentary and Alternative Medicine (CAM) is well suited for rehabilitation and reversal of chronic disease in many cases. The allopathic model primarily uses medications, surgeries or radiation therapy to treat chronic conditions. These are the only therapies conventional medicine has to offer. Fortunately, at Triad Of Health Family Healing Center in San Rafael, we have a wide variety of safe and effective therapies that are custom tailored to the uniqueness of each of our patients, allowing us to treat the root cause of Autoimmune Disease. Triad Of Health Family Healing Center will be offering regular free 2-hour autoimmune workshops to help educate the local Marin County community about their health options for a very limited time only.
